

SEG LED Frame Light Guide Panel

Project:	Type:
Item. No.	
Location:	
Notes:	

silicone edge graphic frame

Product Information

Technology

Your graphics will look stunning thanks to the ultra-slim laser cut and etched acrylic back panel. This panel is edge-lit with daylight white Tier 1 6500K LEDs, which are both ultra-bright and energy-efficient. The LEDs shine through the acrylic, creating a uniformly lit "curtain of light" that ensures your graphics will stand out and attract attention.

Easy to Change Out Graphics

Simply, place the *SEG LED Frame* panel flat and make sure to align the fabric design with the surface." Then, insert the four corners of the graphic you want to display into the panel edges. Finally, turn on the *SEG LED Frame* and your graphic will be beautifully illuminated from behind for all to see.

Custom Built in the USA

LED SEG Frames can be built into customizable sizes up to 48"x60". All aspects of designing, engineering, and manufacturing occurs here in the United States. This results are shorter lead times for you, as well as direct communication with our USA-based team.

specifications

electrical

- Electrical rating: 24V DC

optical characteristics

- Lamp source: Tier 1 ANSI Binned LEDs
- Color temperature: 6500K

panel

- Optical grade materials - 96% clarity
- Laser cut and patterned for consistent uniformity
- Integrated heat sink for thermal management

dimensions

- Custom sizes available, up to 48" x 60" • Only 0.61" depth

warranty

- 3 years
- cULus certified
